

We Think Garden

We Understand Your Needs

We Understand Your Expectations

Our Company In A Nutshell

- ▶ The Staff of Ondela Landscaping consists of some of the most experienced and knowledgeable people in the profession.
- ▶ Our team's diverse expertise enables us to design and implement a wide variety of projects and to take them from Concept to Completion.
- ▶ Let's face it, we live in a world of first impressions. A great deal of the value of your property is based on its curb appeal. But not everyone has the time, talent, and /or expertise to properly care for their landscapes.
- ▶ That's where we come in. By closely working with our clients and understanding their needs, we offer sustainable solutions for effective maintenance of lawn & landscapes in South Africa.

Our Philosophy

- ▶ We believe that well-conceived and properly maintained landscapes not only enhance the quality of our lives, but also help reconnect us with nature in rewarding ways. By enhancing and restoring soil health, we focus on strong root development which in turn creates the best foundation for sustainable landscapes.
- ▶ This natural approach excludes the use of traditional synthetic products to achieve ecologic balance which allows plants to better adapt to their site. By understanding the biology of plants and following soil sample results we work closely to apply only the key nutrients and organics that may be missing in the soil profile.

Our Mission

- ▶ To be a responsible, trustworthy, and dependable company capable of developing long-term relationships based on mutual respect.
- ▶ To maintain the basic principal that quality is more important than quantity.
- ▶ To profit fairly through our experience, efficiency, diligence, and creativity and to share this profit with employees.
- ▶ To maintain a safe, positive workplace in which individual employee's talents are encouraged, used, and recognized.
- ▶ To stand behind our products and services to ensure optimum client satisfaction.
